* Data during ventilation operational hours (excludes weekends/federal holidays and/or breaks in venting operations)
 * It should be noted that there are currently no regulatory VOC levels established for outdoor air quality.
 * Aeroequal VOC module used to measure total VOCs.
 * Instrument range are 0.1 parts per million (ppm) to 30 ppm.

* Effective January 1, 2026, all VOC concentrations are reported to one decimal place. This adjustment reflects the reporting limit of the new instrumentation being utilized for our air monitoring program, which is 0.1 ppmv.

* Data during ventilation operational hours (excludes weekends/federal holidays and/or breaks in venting operations)

* It should be noted that there are currently no regulatory VOC levels established for outdoor air quality.

* Aeroequal VOC module used to measure total VOCs.

* Instrument range are 0.1 parts per million (ppm) to 30 ppm.

* Effective January 1, 2026, all VOC concentrations are reported to one decimal place. This adjustment reflects the reporting limit of the new instrumentation being utilized for our air monitoring program, which is 0.1 ppmv.

* Data during ventilation operational hours (excludes weekends/federal holidays and/or breaks in venting operations)
 * It should be noted that there are currently no regulatory VOC levels established for outdoor air quality.
 * Aeroequal VOC module used to measure total VOCs.
 * Instrument range are 0.1 parts per million (ppm) to 30 ppm.

* Effective January 1, 2026, all VOC concentrations are reported to one decimal place. This adjustment reflects the reporting limit of the new instrumentation being utilized for our air monitoring program, which is 0.1 ppmv.
