

# Red Hill Bulk Fuel Storage Facility CLOSURE PROCESS

*The mission of Navy Closure Task Force-Red Hill (NCTF-RH) is to execute the permanent decommissioning of the Red Hill Bulk Fuel Storage Facility (RHBFSF) safely and expeditiously, and continue long-term environmental remediation in coordination with State and Federal regulators in order to protect public health and the environment.*

## ENVIRONMENTAL

### ENVIRONMENTAL LINE OF EFFORT

- Spill Prevention and Preparedness.
- Protection of air, water, and land resources through regulatory compliance oversight and the use of best management practices.
- Perform site assessment as part of permanent closure.

## CLOSURE

### CLOSURE PLAN LINE OF EFFORT

- Clean and render all tanks unusable for fuel storage. Prepare facility for long-term environmental monitoring.
- Conduct an assessment plan for deconstruction and management of pipelines with removal of other infrastructure including electrical, fire protection, structural, waste water and other equipment in the facility.
- Removal & management of waste generated during cleaning of each tank.
- Decommissioning requires regulator inspections & approval for site closure.

## REMEDIATION

### REMEDIATION LINE OF EFFORT

- The Environmental Protection Agency and Hawaii Department of Health will conduct inspections & approval for site closure.
- Recovery and Restoration of the Red Hill Drinking Water Shaft.
- Extended monitoring of the Red Hill site (Navy will continue monitoring post tank cleaning & ventilation).

## COMMUNICATION

### COMMUNICATION LINE OF EFFORT
